EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE SPECIFICATION:

In the abstract, line 15, "(Fig. 3)" has been deleted.

The above change to the specification was made to correct a typographical error.

REASONS FOR ALLOWANCE

The instant invention is deemed to be directed to an unobvious improvement over the invention patented in U. S. Patent No. 5,794,515 to Bethke. The improvement comprises an axial piston machine with a swash plate wherein provided in the swash plate or the control piston, there is a resilient element which acts on the slide block with a force directed towards the regions fixing the slide block for the purposes of preventing inadvertent rotation of the slide block.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

PRIOR ART

The patent to Bethke is cited for the showing of an axial piston machine similar to applicant's but lacking a resilient element.

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consists of six patents.

Stolzer, Boone, Goto et al. '058, Goto et al. '796, Wagenseil, and Kent et al., are cited to show axial piston machines.
